

NEW TECHNOLOGY TO RESOLVE SYMPTOMS FROM NEUROPATHY AND CHRONIC JOINT PAIN

Symptoms of Peripheral Neuropathy Depend on the Peripheral Nerve Affected

Sensory nerve damage

Unusual sensations

Pain from light touch

Burning

Tingling

Pain from light touch

Numbness

Balance problems

Motor nerve damage

Muscle cramping

Twitching

Reflex abnormalities

Autonomic nerve damage

Excess sweating

Getting full quickly

Impotence

Orthostatic hypotension (dizziness or fainting after standing up)

SANEXAS

A Revolutionary Electronic Cell Signaling Treatment

SANEXAS Electric Cell Signaling Machine uses electrical signals to treat pain and circulatory conditions. This electric cell signaling device is much like a traditional TENS unit, but it is larger in size and penetrates deeper which is more effective in reducing pain. The pharmaceutical strength, frequencies, and associated harmonics are greater than the typical TENS unit, which is why trained medical professionals are present when it is in use.

WHAT IT TREATS

The SANEXAS Electric Cell Signaling Treatment treats (but is not limited to) the following:

- Neuropathy/radiculopathy pain
- Improve nerve health and regeneration
- Neuromuscular reeducation and training
- Creates relief of chronic intractable pain (osteoarthritis)
- Muscle spasms relaxation
- Increased local blood circulation
- Prevents the retardation of disuse atrophy
- Acute/chronic pain conditions
- Post-traumatic pain syndromes
- Aids in treatment in post-surgical pain conditions
- Improved tissue/organ function

HOW MANY TREATMENTS

The average person will start noticing changes after 10-18 treatments. Some may notice changes earlier than later depending on the person and area receiving treatment, but it is necessary to receive a series (multiple) treatments for the SANEXAS treatment to be effective.

NEUROPATHY CAUSES

- **Overweight**
- **Smoking**
- **Diabetes**
- **Post Chemotherapy**
- **Malnutrition**
- **Herniated Discs**
